

The Renee Chiea Plan
10 Steps to
Health Care
Liberty

Healthcare is a liberty, not a right!

4. Improve Member Care
We will defer defining clinical care and scientific industry standards to medical clinicians; and away from attorneys and bureaucrats. We will enhance member protections and ensure access to member care.
5. Eliminate Federal Exchanges
We will eliminate Federally run exchanges and Federal level control of the individual market, dramatically reducing costs to taxpayers and reducing health care premiums.
6. Create "High risk pool" program
We will create a Government program to subsidized a "high risk pool" to provide affordable coverage for people with pre-existing conditions; without negatively impacting the cost of healthcare for everyone as the current system does.

The following slides will dive deeper into each of these statements and explain what and how these will be achieved from a policy perspective.
