

The Renee Chiea Plan

10 Steps to Health Care Liberty

7. Innovate the Employer Group Market

We will encourage innovation in the employer provided group insurance market by reducing and eliminating overburdensome and unnecessary Federal regulations and mandates.

8. Oversight not Control—The American Way

We will rectify and reform the current oversight framework, which is overgrown, ineffective, and incredibly expensive; and replace it with oversight that works to protect consumers, reduce cost burden to consumers, all without crushing innovation.

9. Reform Public Health Power

We will reconceptualize the role and power of Public Health, in order to prevent any future abuse of public trust.

10. Solidify Health Care Independence

We will increase and protect the power to each individual to seek confidential healthcare, to maintain control of individual data, and to keep private all aspects of the individual's medical information and medical sovereignty.

Healthcare is a liberty, not a right

The following slides will dive deeper into each of these statements and explain what and how these will be achieved from a policy perspective.
