

Healthcare is a liberty, not a *right*!

The Renee Chiea Plan

10 Steps to Health Care Liberty

1. Address Funding Streams

We will restructure and improve Federal funding streams in the health care market, saving billions of Federal taxpayer dollars. (such as: Block grants or Capitation)

2. Improve Cost Management

We will clearly define a prior authorization process that is both transparent and efficient; reducing and managing over-utilization and unnecessary costs in the healthcare system.

3. Address Essential Health Benefits

We will clearly define Essential Health Benefits, reducing "interpretation" issues and scope creep issues, that drive up health care costs for everyone.

The following slides will dive deeper into each of these statements and explain what and how these will be achieved from a policy perspective.
